SUPERIOR SWIM SYSTEMS, INC.

Superior Swim Systems, Inc. designs, sells, manufactures and installs stainless steel integral recirculation gutter systems for commercial and upscale residential swimming pools nationwide. We also provide stainless steel pools, custom spas, Balance tanks, movable bulkheads and other components for use in or around your swimming pools. Our quality of work, pricing, and on time installations make us superior in the market. We were incorporated in 1987 and have been in continuous operation under the same ownership since that date. Our customers consist of Federal, City and County Governments, Colleges and Universities, Hospitals and Rehabilitation Institutions, Hotels, Water Theme Parks, and upscale residential homes. Our corporate and national sales offices are located in Naples, Florida with our fabrication facilities, shipping and installation crews centrally located in Columbus, Ohio.

-  **Budget Estimates and detailed quotes**

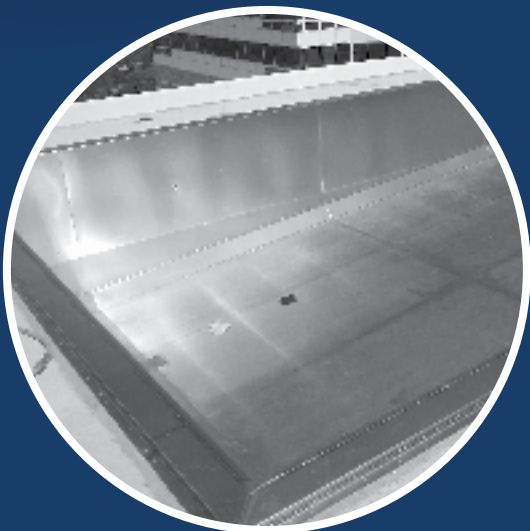

STAINLESS STEEL POOLS AND SPAS

Superior Custom swimming pools and spas are designed for any application and requirements our clients may have. We can provide luxurious residential or commercial pools and spas that you will be proud to own.

Stainless steel is the best choice due to its light weight and long lasting construction and refined beauty. One piece or section built can reduce installation time by weeks. Smooth surface of stainless steel eliminates scratches and scrapes to swimmers. Available with steel or concrete floors and tile trim or full tile can be added. Stainless steel is low maintenance and more hygienic product. The light weight, high strength and watertight construction make the perfect option for elevated and rooftop applications. We use a minimum 10 gauge steel and TIG welded to ensure no leaks or cracking will ever occur. Contact Superior Swim Systems for inquiries and design assistance for making your vision come to reality.

STAINLESS STEEL PERIMETER GUTTER SYSTEMS

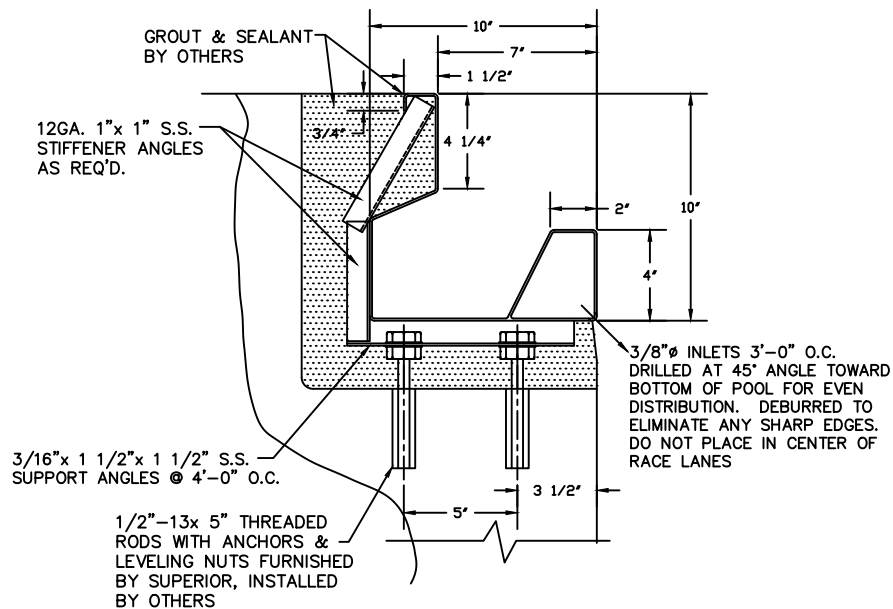

Our perimeter recirculation systems provide two functions, supply filtered water to the pool and return dirty water to the filter for cleaning. This self-containment makes an ideal choice for renovations and new construction. All gutter systems are 12 gauge type 304L or 316L stainless steel with a #3 polish.

ADVANTAGES

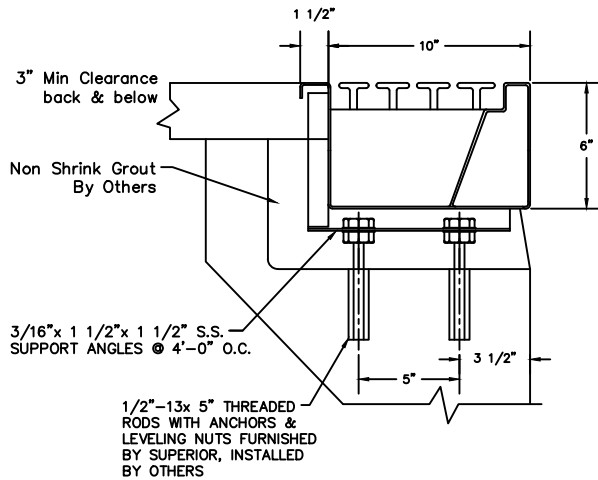

- ✓ Stainless steel construction and TIG welded (tungsten inert gas) to insure a **watertight seal** and hydrostatically tested.
- ✓ 360 degree skim on the top of the water where most debris float will keep the **pool cleaner** and easier to maintain.
- ✓ Minimizes **buried piping** around the pool.
- ✓ Perimeter systems simply create a **faster competition pool** by absorbing swimmers splash in every direction.
- ✓ **5 year warranty** to ensure your system will function properly for years to come.
- ✓ Aesthetically pleasing and impervious to **climate changes**.
- ✓ All gutters custom manufactured for exact **form, fit and function**.
- ✓ Great for **high end** residential pools with **infinity edge designs**.

WATER FEATURES

Superior stainless steel water features brings beauty and elegance into any space. Design assistance and fabrication of water walls, reflection pools, waterfalls, and water feature basins to meet the needs of our clients. Stainless steel construction provides a reliable and long lasting product while being aesthetically pleasing and luxurious.

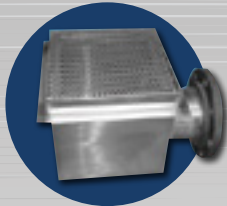

MOVEABLE BULKHEADS

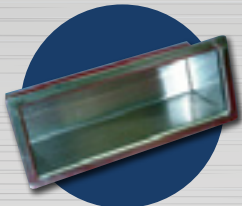

- ✓ Superior Bulkheads are **constructed of all stainless steel and fiberglass** grating on the top and sides.
- ✓ Designed to **support a live load of 100 pounds** per square foot.
- ✓ Bulkhead will **roll freely on Teflon wheels** and requires only two people to move and locks into place.
- ✓ Available in moveable or stationary configurations with **multiple floatation systems** to allow for easy movement in the pool.
- ✓ Available in **any size** with a wide range of accessories.
